

ETA / Government Portal Intergration

Providing Software and Services to Municipal Government

GovtPortal is a Payment Technology company and we work specifically with local and county governments. Additionally, we also work within multiple city departments including utilities, parks and recreation, taxes and business licenses. In fact, we work with well over 800 cities and counties in the US. Specifically, our payments are completely integrated with ETA, so you can now accept credit/debit card payments from the payment web site and the payments will be posted directly to your ETA Court software immediately. Any payments accepted in the office or online will auto-post into the ETA software when the defendant clicks on the accept button when entering a credit card payment. Let me know if you would like to schedule a demo over the phone so you can see the portal for yourself.

- "The ability to accept online and over the counter payments
- "Next Day Funding availability
- "No Cost for the 'card readers' or hardware
- "One simple flat rate for all card types (no tier pricing and no transaction fees - easy reconciliation)
- "3.50% Flat Rate
- "No Contracts & No Early Termination Fees (simple 1 pg. Application)
- "No Additional fees and no start up costs
- "Multiple rate options (charge cardholder or absorb fees)
- "Simple and Easy bank reconciliation process
- "Robust Reporting Features
- "24/7 Automated phone number to accept payments

I have taken the liberty of attaching our one page Application for your review and I'm happy to discuss specifics with you guys at anytime. All we need in addition to the application is a voided check, and a copy of state a photo ID from the signer. I'll follow up later this week to ensure receipt and answer any questions.
